#	Please tell us a bit about the additional water efficiency and conservation training that would be helpful for you. Are there specific areas you would like covered in more depth? Would you prefer regional in-person workshops?	Date
1	Regional advice would be appropriate. We don't even have enough rain to collect right now, so rain barrels will be useful only in the future. Also, how dishes and clothes are washed might be relevant to discuss.	4/22/2015 3:30 PM
2	A lot of this webinar seemed geared to residential camps, and I feel as if we as a day camp are a little different. Regional workshops would be helpful, as I feel like what we are dealing with in SoCal is a very different (or worse) beast	4/22/2015 3:22 PM
3	I am curious if there are other water saving techniques unique to high altitude camps.	4/22/2015 3:04 PM
4	Grant opportunities.	4/22/2015 3:03 PM
5	I would love it if my local water department offered regular educational events in the community! I think we could really use it where I live!	4/22/2015 3:00 PM
